MIX ARCHITEKT

Mix Architekt's AB + 2 FX Layout for the Xone K2's & Traktor Pro
**Use the Import Button on the Bottom Left of Traktor's Preferences to load the tsi!**
2 Columns = Control for 1 Deck; FX are stacked in rows.
This tsi is for those who only want to run 2 decks.
If you want 4 decks of control, buy 2 K2's!
Lots of layer switching sucks.

MIDI CH 12 - Non-Latching
