Receives program(s) from your minilogue, according to the program number(s) selected in the Program List.

ReceiveALL button

Receives all programs from your minilogue.

Program list

This screen is used for displaying the program data and editing programs.

Selecting programs

Click on a program in the program list to select it.

If you select a program, the selected program will be transferred to the minilogue and the tone can be checked.

Tip Select items in the program list while holding down the command key in Mac or the Ctrl key in Windows to select several items at a time.

Sorting programs

Drag and drop items in the program list to change the order of the list.

Tip You can also select several items and sort them at once.

Copying programs

To copy the programs, drag and drop while holding down the Option key on a Mac or the Ctrl key in Windows.

Tip You can also select several items and copy them at once.

Changing program names

Double click on a program name to edit.

Drag the item from the program list and drop it to the place where you want to save it into the favorite.

Sorting favorites

You can drag and drop items around in the favorites menu to change their order.

Preset Data

Preset data is a collection of programs, such as factory presets, provided by KORG.

Choose "Option" from the "Open Preset Window..." menu to access the preset data window.

Listen to the presets

Select a program in the preset data window to try out the sound on your minilogue.

Adding programs to the Program List

Drag and drop individual programs from the Preset Data window to add them to the program list.

Install additional preset data

Launch the sound librarian by dragging and dropping the preset data file (*.mnlpreset) on the Sound Librarian application icon.

Tip You can also install preset data via "Import Preset File" in the "File" menu.

Removing preset data from the preset data window

Click "uninstall all presets and quit" under "options" to uninstall all additional preset data that have been installed.

Preference settings

Choose "Option" from the "Preferences..." menu to access the Preferences dialog box.

MIDI ports

Specify MIDI ports manually

Normally the minilogue that's connected will be detected automatically. Turn this feature on if you want to specify the MIDI ports manually. Use this when several minilogues are connected to the computer. If this setting is on, specify the ports where your minilogue's MIDI IN/OUT controller is connected.

MIDI IN

Specify the MIDI IN port where your minilogue is connected.

Tip Usually this will be the "KBD/KNOB" port in the minilogue.

MIDI OUT

Specify the MIDI OUT port where your minilogue is connected.

Tip Usually this will be the "SOUND" port in the minilogue.

Misc.

Receive library data automatically

If this setting is on, data will be automatically loaded from your minilogue when starting up the minilogue Sound Librarian. If this setting is off, data will not be automatically loaded.

Warn before writing data

If this setting is on, a warning dialog box will appear before writing data to your minilogue. If this setting is off, data will be written without the appearance of a warning dialog box.

Troubleshooting

Software won't start up

- Make sure that your computer meets the operating requirements.
- Check whether other applications might be running.
If other applications are running, the minilogue Sound Librarian might be unable to start up, or might be unable to transfer data.

Can't transfer data

- Make sure that the minilogue has been detected by the connected computer.
Windows 7/8.1/10: go to the Control Panel, open "Hardware and Sounds" → "Device Manager," and check the "Sound, Video, and Game Controllers" tab.
Mac OS: open "Applications" → "Utilities," then start "Audio MIDI Setup" open and check the "MIDI Studio" window by selecting "Show MIDI Window" from the "Window" menu.
- Make sure that the latest Korg USB MIDI driver is installed.
You can download the latest Korg USB MIDI driver from the Korg website. (<http://www.korg.com/>)
- If you're specifying the MIDI ports manually, make sure that the MIDI port settings are correct.
- Make sure that the minilogue is connected directly to your computer without a USB hub.
