

CIRCUIT

Getting Started Guide

Overview

Circuit

Thank you for buying Novation Circuit, our standalone groovebox designed to inspire. Two Novation polysynths, a four-part drum machine and an intuitive sequencer: it'll have you making great new music in seconds.

Any moment now, you'll be hitting pads, tweaking knobs and creating a brand new track, brimming with fat grooves and beats, all locked in time and key.

First, however, please take a few minutes to read through this guide. We know it's tempting to skip ahead, but this will help you avoid problems and get up and running in no time.

Enjoy!

Get Started

Follow these steps to get up and running quickly.

This guide will take you through each step in more detail, so please read on before you start.

1. Check your box contents
2. Fit your batteries
3. Switch on and hear it!
4. Register and download the included software
5. Powering
6. Enable SAVE
7. Start a new session
8. If you run into problems...

Get Started

1. Check your box contents

You should find all of this in your box. If anything is missing, please contact us.

Documentation

- This helpful guide
- Circuit patches sheet
- Safety information sheet

Hardware

- Novation Circuit
- 6× AA batteries
- USB cable
- Two MIDI break-out cables
- 12V DC power supply

Your software bundle code is on the back of this guide.

Get Started

2. Fit your batteries

Take the Circuit and batteries out of the box.

Slide the battery door on the side to release it.

Turn your Circuit upside down and look for the diagram that shows you which way round the batteries should be inserted.

Slide the batteries into place following the diagram.

3. Switch On and Hear It!

Press and hold the power switch for at least half a second to turn Circuit on. If you are running on batteries you will see the battery level meter briefly then Circuit will turn on. If you have the power supply connected you will see a power symbol. It can take up to four seconds to be fully ready to use.

Next press the PLAY button on the right hand side to start the demo session.

Tip: *Circuit comes pre-loaded with demo sessions, so you can immediately hear what it can do. As soon as you've played with these sessions, you'll probably want to make your own music, so read on...*

|||≡ Ableton Live Lite

Say hello to your new studio. Ableton Live is a flexible music production environment that is also a powerful performance tool – made to inspire creativity. That's why it's used everywhere, from the smallest bedroom studios to the world's biggest stages.

How to get Live Lite

Download and install the latest version of Ableton Live Lite at:
www.ableton.com/live-lite

Launch Ableton Live Lite.

Live will guide you through an authorization process and you will be asked for your serial number.

Your serial number will be found in your account on the Novation website once you've registered your unit.

Upgrade to Live 9 today

Live 9 Standard and Suite vastly expand your creative potential with more features, more sounds and more possibilities.

As a Live Lite user you can save up to USD 100/EUR 70 on an upgrade compared to buying a new license. See what you'll get in Live 9 Standard and Suite: www.ableton.com/lite-upgrade

This copy of Ableton Live Lite provides:

- Ableton's fast, intuitive workflow, based on unique Session and Arrangement Views
- Professional-quality audio recording and MIDI sequencing on up to 8 tracks
- Creative sound design and processing with Impulse and Simpler instruments, plus Drum, Instrument and Effect Racks
- 600 MB of loops and samples
- Plug-and-play compatibility with many hardware controllers
- Studio effects including EQ, compression, reverb, delay, chorus, filter and more
- Unlimited use of the included Ableton instruments and effects
- Unlimited use of your favorite VST and AU instruments and effects

4. Register and Download the Included Software

Go to www.novationmusic.com/register and click Register Your Product.

The image shows the Novation website's login and registration page. At the top, the Novation logo is on the left, and navigation links for 'Products', 'Community', 'Support', and 'Where to buy' are on the right. Below the navigation bar, the page is divided into two main sections. The left section is titled 'Login' and 'Register Your Product' in large, bold letters. Below the title, there are links for 'Forgot your password?', 'Don't have an account?', and 'If you've left product registration at account page? Click here.' The right section contains a form with two input fields: 'Email address *' and 'Password *'. Below these fields is a black button labeled 'Login'.The image shows a close-up of the registration form on the Novation website. It contains two input fields: 'Product *' and 'Serial Number *'. The 'Product *' field has a dropdown menu with 'Circuit' selected. Below the 'Product *' field, there is a small text label that reads 'Please select the product that you wish to register'. Below the 'Serial Number *' field, there is a small text label that reads 'Please enter the serial number'.

Select Circuit from the dropdown list and enter your serial number. You can find it on the back of this booklet and on the label on the underside of your Circuit: it is 12 or 13 characters long: the first 3 characters can be numbers or letters, but the rest will only be numbers.

Your serial number is not the same as the software bundle code.

Then click "Get My Stuff" to download your software. If you don't have a Novation account, we will ask for a few details.

5. Powering

To use Circuit without batteries you can connect the included power supply. This will work with or without the batteries in place.

Turn on Circuit by holding the power button for more than half a second. The power symbol will be displayed if the power supply is connected and working correctly.

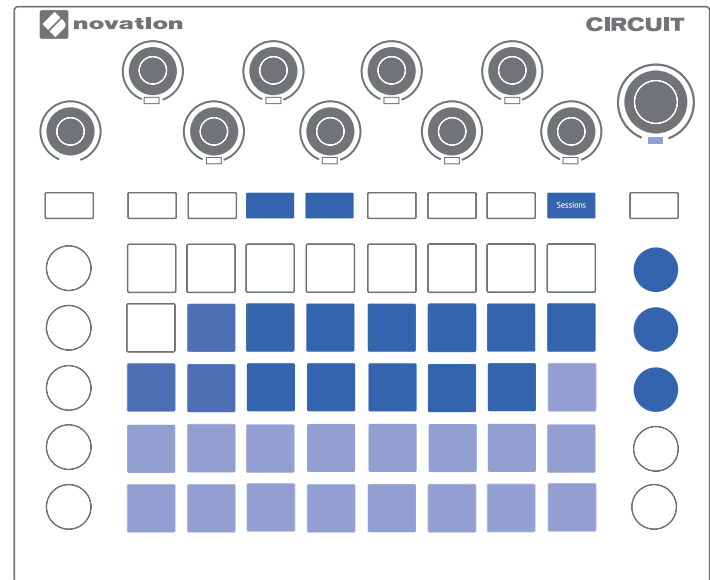

6. Enable SAVE

Circuit ships as save-disabled which means that initially you can't save your sessions. This is easy to change though. Simply hold down the SHIFT and SAVE buttons while switching Circuit on. You can tell when SAVE is available because it is dimly lit blue.

7. Start a New Session

Tip: This guide is designed to get you up and running. We think you'll have fun and discover more by just playing around, but if you want more in-depth information please download the User Guide from our website.

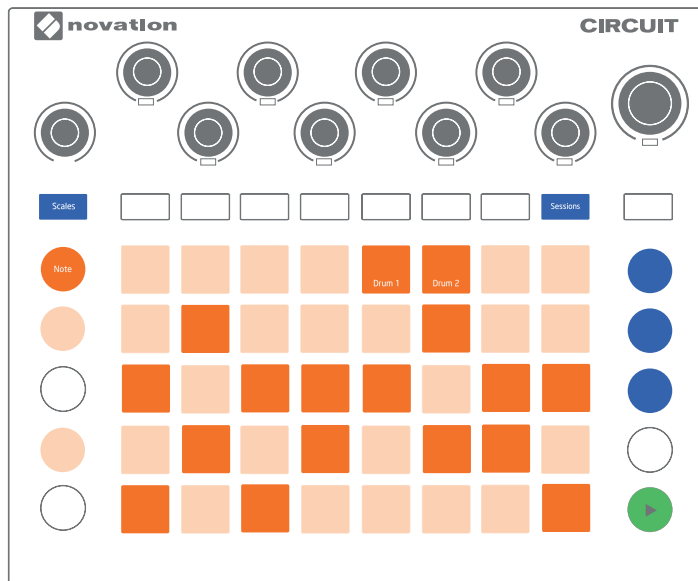

Press the Sessions button and you will enter the Sessions view. The pads will change to show the available Sessions with the first one selected. When you first receive your Circuit this will contain a demo Session, but you can change or delete this whenever you want.

Get Started

Rather than change the demo, select an available empty session.

Next press the Drum 1 button and press PLAY. You will see the play position cycling round through the pads. The top two rows are for Drum 1 (kick) and the bottom two rows are for Drum 2 (snare).

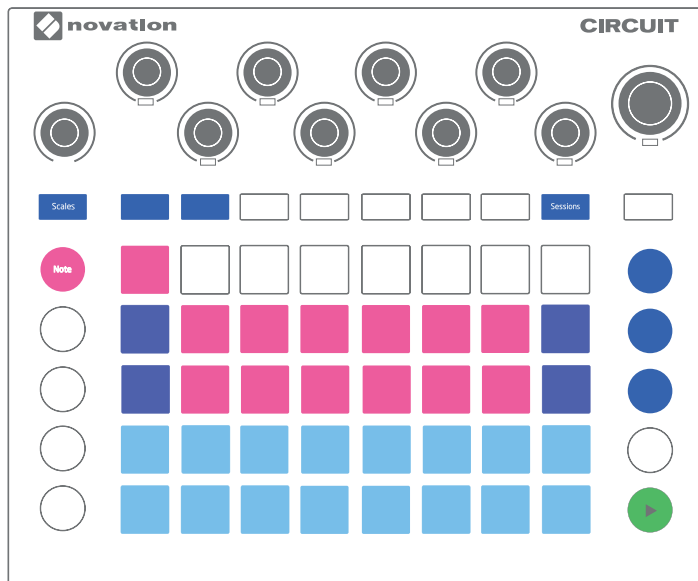

Press pads to turn steps on and off for Drum 1 and 2. You will hear the effect as the play position passes over the step.

Get Started

Next press Synth 1. You can use the top two rows to play the first Synth patch.

Press Record and play the pads. Your notes and chords will be stored to steps in the sequencer, and you'll hear the effect instantly when the pattern cycles round.

To edit any Synth part notes, press and hold a step on the bottom two rows while pressing notes from the top two rows.

So, you've got kick, snare and a bassline going already. Now press **SAVE** twice. This will save your Session into the position you chose earlier in the Sessions view. You must save your Session in order for it to be recalled after Circuit has been turned off.

Why not now try Drum 3 and 4 and Synth 2 and see how you get on.

8. If You Run Into Problems...

If you're having trouble, please don't go back to where you bought your Circuit. Let us help: we have free video tutorials online, including a step-by-step setup guide.
