DDJ-SP1

Serato Scratch Live
Settings File Import Guide

Before start (Important)

Pioneer provides a settings file(XML file) exclusively for use with the Serato "Scratch Live" DJ software. Scratch Live can be controlled from this unit if this file is imported to your computer.

- A computer on which Scratch Live is installed is required.
- A separate Scratch Live-certified mixer or sound card is required.
- Not all functions of Scratch Live are supported.

Users should make their own settings as necessary.

- To make additional settings, see the operating manual included with your Scratch Live-certified device.
- To operate Scratch Live by using this unit's buttons and knobs, see the separate "DDJ-SP1 Hardware Diagram for Serato Scratch Live 2.5"(PDF file) of supported functions.

- There are 2 separate settings files for 2 decks and 4 decks. If you use a Scratch Live-certified device with only 2 decks, use the settings file for 2 decks(filename: PIONEER_DDJ-SP1_VXXX_2DECKS.xml).

If you use a Scratch Live-certified device with 4 decks, use the settings file for 4 decks(filename: PIONEER_DDJ-SP1_VXXX_4DECKS.xml).

Cautions:

Scratch Live is a product of Serato.

Pioneer is not in the position of answering any inquiries on the usage of Scratch Live. Please refer to the operating manual of your Scratch Live-certified device or other resources.

General Disclaimer

- Pioneer will accept no responsibility whatsoever for damages resulting from downloading or installing this settings file. Operation of this settings file is not guaranteed.
- Users should take full responsibility for downloading, installing and using this settings file.
- The specifications of this settings file are subject to change without notice.
- Please note that services regarding this settings file may be terminated without notice.

Backing up the current settings file

We recommend backing up the current settings file using the procedure below so that the current settings can be restored if necessary.

! The users who use Scratch Live for the first time should skip this process.

1. Connect a Scratch Live-certified device and a computer using a USB cable.

2. Launch Scratch Live.

3. Select [SETUP] in the upper right of the screen.

4. Select [MIDI] tab on the "SETUP" screen.

! Only when a Scratch Live-certified device is connected, the [MIDI] tab will appear.

5. Click [Save As] button.

Save the file with an easily identifiable name.

(e.g. BackUp.xml)

Deleting the current settings file

Cautions

If another settings file has already been imported, the settings file for this unit may not work properly. If so, delete the file named "AUTO_SAVE.xml" according to following procedure before you import this settings file.

! The users who use Scratch Live for the first time should skip this procedure.

1. Open "MIDI" folder.

— For Windows users

Open "MIDI" folder in the following location using Explorer.

Users\%XXXX%\My Music*_Serato_*MIDI

! Above "XXXX" means your login name.

— For Mac OS X users

Open "MIDI" folder in the following location using Finder.

Users/Music/*_Serato_*MIDI

When there is no "MIDI" folder, proceed to chapter of "Importing a settings file".

2. Delete the "AUTO_SAVE.xml" file.

Delete the "AUTO_SAVE.xml" file in the "MIDI" folder.

! "AUTO_SAVE.xml" file is automatically created by Scratch Live.

The file does not appear on [MIDI Presets] of the "SETUP" screen.

Importing a settings file

1. Access the Pioneer support website

(<http://pioneerdj.com/support/>) and click

"Setting File for Scratch Live" of "Software Download" of DDJ-SP1 to download the settings file.

The downloaded file is compressed in ZIP format.

Unzip it before starting.

— For Windows users

Right-click the downloaded file and select [Extract All]. The unzip wizard appears. Specify the folder in which the file is to be unzipped and unzip (decompress) it.

— For Mac OS X users

Double-click the downloaded ZIP file to unzip it.

When unzipped, files named "PIONEER_DDJ-SP1_VXXX_2DECKS.xml" and "PIONEER_DDJ-SP1_VXXX_4DECKS.xml" are extracted.

! Depending on the browser you are using, the file may be unzipped automatically. If so, you can skip the above process.

2. Save the downloaded files in step 1 in the following "MIDI" folder.

— For Windows users

Users\%XXXX%\My Music*_Serato_*MIDI

! Above "XXXX" means your login name.

— For Mac OS X users

Users/Music/*_Serato_*MIDI

If there is no "MIDI" folder in "_Serato_" folder, create "MIDI" folder by yourself.

3. Connect DDJ-SP1 and a Scratch Live-certified device to your computer using USB cables.

4. Select "DJ software other than Serato DJ" in the utilities mode of DDJ-SP1.

To change the settings in the utilities mode, see the chapter of "Changing this unit's settings" in DDJ-SP1's Operating Instructions (Advanced Edition).

5. Launch Scratch Live.

6. Select [SETUP] in the upper right of the screen.

7. Select [MIDI] tab on the "SETUP" screen.

8. Click [Load] button after selecting the settings file for this unit in the "MIDI Presets" window.

If you use a Scratch Live-certified device with 4 decks, select "PIONEER_DDJ-SP1_VXXX_4DECKS" among the settings files saved in step 2.

If you use a Scratch Live-certified device with only 2 decks, select "PIONEER_DDJ-SP1_VXXX_2DECKS".

9. Tick [Enable MIDI Output Lighting] check box.

In order to light the Pads and buttons on this unit, you need to tick this check box.

! Some Pads and buttons may not be lit depending on functions you use. For details, see the separate "DDJ-SP1 Hardware Diagram for Serato Scratch Live 2.5" (PDF file).

10. Select [Playback] tab on the "SETUP" screen.

11. Tick [Enable Hot Cues] check box.

In order to use the Hot Cues function, you need to tick this check box.

12. Click the [SETUP] in the upper right of the screen to close the "SETUP" screen.

Now, all the settings are completed.
